## Quantum Foundations and Open Quantum Systems:Lecture Notes of the Advanced School

The Advanced School on Quantum Foundations and Open Quantum Systems was an exceptional combination of lectures. These comprise lectures in standard physics and investigations on the foundations of quantum physics.

On the one hand it included lectures on quantum information, quantum open systems, quantum transport and quantum solid state. On the other hand it included lectures on quantum measurement, models for elementary particles, sub-quantum structures and aspects on the philosophy and principles of quantum physics.

The special program of this school offered a broad outlook on the current and near future fundamental research in theoretical physics.

The lectures are at the level of PhD students.
