Fractal Microstrip Antenna Design, Fabrication and Measurements: Fractal Microstrip Antennas

Mohamed I. Ahmed

The two main properties of the fractal antennas were investigated. Firstly, the self-similarity property was studied. The cavity model is used to analyze an equilateral triangular patch on a grounded dielectric substrate. A Matlab program was built to calculate the resonant frequencies, the input impedance, the reflection coefficient, etc. Then this triangular patch was used as the initiator of the Sierpinski Gasket fractal antenna with probe feeding. The first three iterations of this antenna were studied. These novel shapes include an air gap between the substrate and the ground plane, inverting the patch to reduce the dielectric loss and consequently increase the antenna efficiency and adding a shorting pin to improve the matching conditions as well as reducing the antenna size. Secondly, the space-filling property was studied and the rectangular microstrip patch was used as an initiator to all iterations. The first three iterations of a single pulse microstrip patch antenna were investigated. The second step was to study other shapes like the two pulses, NRZ (Non Return to Zero), Koch at angles 30°, 60°, 80° and 90°, Pulse 2.45 and Pulse 2.45 + Koch 90° microstrip antennas.

From reader reviews:

Sandra Murray:

In this 21st millennium, people become competitive in every single way. By being competitive today, people have to do something to make all of them survive, being in the middle of often the crowded place and notice through surrounding. One thing that at times many people have underestimated it for a while is reading. Yeah, by reading a publication your ability to survive improve then having chance to stay than other is high. For you who want to start reading the book, we give you this specific Fractal Microstrip Antenna Design, Fabrication and Measurements: Fractal Microstrip Antennas book as beginning and daily reading book. Why, because this book is more than just a book.

Ernest Ainsworth:

Here thing why this particular Fractal Microstrip Antenna Design, Fabrication and Measurements: Fractal Microstrip Antennas are different and reputable to be yours. First of all reading through a book is good however it depends in the content than it which is the content is as tasty as food or not. Fractal Microstrip Antenna Design, Fabrication and Measurements: Fractal Microstrip Antennas giving you information deeper as different ways, you can find any publication out there but there is no guide that similar with Fractal Microstrip Antenna Design, Fabrication and Measurements: Fractal Microstrip Antennas. It gives you thrill reading journey, its open up your own eyes about the thing that happened in the world which is perhaps can be happened around you. It is easy to bring everywhere like in park your car, café, or even in your means home by train. For anyone who is having difficulties in bringing the printed book maybe the form of Fractal Microstrip Antenna Design, Fabrication and Measurements: Fractal Microstrip Antennas in e-book can be your choice.

Gloria Wells:

Fractal Microstrip Antenna Design, Fabrication and Measurements: Fractal Microstrip Antennas can be one of your nice books that are good idea. We recommend that straight away because this book has good vocabulary that can increase your knowledge in terminology, easy to understand, bit entertaining but still delivering the information. The article writer giving his/her effort to set every word into delight arrangement in writing Fractal Microstrip Antenna Design, Fabrication and Measurements: Fractal Microstrip Antennas although doesn't forget the main position, giving the reader the hottest along with based confirm resource facts that maybe you can be certainly one of it. This great information may drawn you into fresh stage of crucial pondering.

William Farley:

As a scholar exactly feel bored for you to reading. If their teacher inquired them to go to the library in order to make summary for some book, they are complained. Just small students that has reading's heart or real their interest. They just do what the professor want, like asked to the library. They go to presently there but

nothing reading very seriously. Any students feel that examining is not important, boring and can't see colorful photos on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Fractal Microstrip Antenna Design, Fabrication and Measurements: Fractal Microstrip Antennas can make you experience more interested to read.
