Modular Remediation Testing Systems (AATDF Monograph Series)

C. H. Ward, Katharine Balshaw-Biddle, Carroll L. Oubre

Faster tests - reduced or eliminated permitting, operate within one week of arrival, programmable for 24-hour duration

This monograph presents key information needed to design, construct, and operate similar modular remediation testing systems or to utilize the two existing modular ECRS facilities. The well-sealed, above-ground modular system design minimizes leaks to the environment, facilitates mass balances, and controls test conditions. This allows for multiple uses with minimal permitting.

Modular Remediation Testing Systems is a comprehensive reference for researchers in environmental engineering and for engineering consultants and regulators looking for a pilot-scale system. These pilot-scale systems are uniquely suited to both research development and real-world application at remediation sites.
